INSTRUCTORS: Jennifer Hair
jezerrer@hotmail.com
Mobile: 816-225-9338

COURSE DESCRIPTION: An extension and continuation of intermediate Photoshop tips and techniques. Participants learn how to apply their skills to teach digital imaging and integrate new projects into their curriculum. This course uses lesson files and online tutorials to create impactful digital projects. This course is designed to be taken after Beginning Photoshop, but can be taken as a stand-alone as well if participants are familiar with the Adobe Photoshop program. Participants are encouraged to use their own images for project creation.

COURSE OBJECTIVES: At the end of the course, successful students will be able to:

- Create activities that incorporate highly dynamic instructional techniques into the classroom.
- Create lessons and activities that will promote interactive learning.
- Explore and actively engage in the use of Photoshop and its use in education.
- Analyze considerations of Photoshop for classroom use by creating, designing, and developing appropriate projects in Photoshop.
- Discover and explore educational resources dedicated to the future of visual communications.
- Publish original designs.

TEXT: None. The instructor will provide selected handouts with relevant information.

SOFTWARE: Adobe Photoshop is REQUIRED for this course.

National Standards:

This course will apply the National Educational Technology Standards (NETS), the National Board for Professional Teaching Standards (NBPTS), and the Massachusetts Technology Literacy Standards and Expectations.

NETS:

1. Facilitate and Inspire Student Learning and Creativity
2. Design and Develop Digital-Age Learning Experiences and Assessments
3. Model Digital-Age Work and Learning
4. Promote and Model Digital Citizenship and Responsibility
5. Engage in Professional Growth and Leadership

NBPTS:

1. Teachers are Committed to Students and their Learning
2. Teachers Know the Subjects they teach and How to teach those Subjects to Students
3. Teachers are responsible for Managing and Monitoring Student Learning.
4. Teachers Think Systematically about their Practice and Learn from the Experience.
5. Teachers are Members of Learning Communities.

Massachusetts Technology Literacy Standards addressed:**Standard 1:**

Demonstrate proficiency in the use of computers and applications, as well as an understanding of the concepts underlying hardware, software, and connectivity. This standard includes:

- learning and adapting to new and emerging technology tools.

Standard 2:

Demonstrate the responsible use of technology and an understanding of ethics and safety issues in using electronic media at home, in school, and in society. This standard

- relates to social, ethical, and human issues. It promotes positive attitudes toward the uses of technology, as well as responsible use of information. This standard also includes recognition of technology's impact on civic participation, the democratic process, and the environment;
- aims to ensure that students understand general rules for safe Internet practices, including how to protect their personal information on the Internet;
- is to help students develop an awareness of the personal image that they convey through the information they post on the Internet;
- aims to ensure that students understand federal and state laws regarding computer crimes; and
- supports students in exhibiting leadership for digital citizenship.

Standard 3:

Demonstrate the ability to use technology for research, critical thinking, problem solving, decision making, communication, collaboration, creativity, and innovation. This standard:

- focuses on applying a wide range of technology tools to student learning and everyday life;
- aims to ensure that students will be able to use technology to process and analyze information;
- is to help students develop skills for effective technology-based communication;
- includes the use of technology to explore and create new ideas, identify trends, and forecast possibilities; and
- aims to provide students with an awareness of how technology is used in the real world.

COURSE EXPECTATIONS:

- Completion of four weekly modules using the Blackboard learning management system through Framingham State University is mandatory (module assignments and due dates/times outlined on Blackboard course home page). It is expected that you will spend approximately 3 hours per week engaging in course content. You may login at any time of the day or night to complete assignment
- Completion of the module projects
- Completion of interactive tutorials

- Completion of the final project
- Discussion Boards (see below for expectations)

DISCUSSION BOARD EXPECTATIONS:

- The discussion board is a crucial part of this class. Not only will you be asked to respond to a weekly question, but you will also need to read and respond to others to fully benefit from this learning experience.
- Stay on task and answer the question being addressed
- Be respectful and polite at all times when responding to your fellow classmates even if you do not share the same opinion
- Read all posts so you do not repeat what someone else has written
- No cursing
- Please be thoughtful and use complete sentences.
- All discussion comments should be made before the start of the next Module.
- Make sure you check the discussion later in the week to see what others said about your comments

COURSE INSTRUCTIONAL STRATEGIES USED:

Combination of direct instruction, guided practice, demonstration, cooperative learning, online discussion, tutorial videos and hands-on development of materials will be used
