

Emergency Contraception

The Health Center has two types of Emergency Contraception available to students with an appointment - Plan B and Ella. A healthcare provider will help you determine if you are at risk for pregnancy and which option would work better for you. The cost is \$20 for plan B and Ella. Both work best when taken as soon as possible after unprotected intercourse. When making an appointment for Emergency Contraception, please mention that you need to be seen that day.

If the Health Center is closed, we recommend students go to the pharmacy or urgent care to obtain Emergency Contraception. Plan B is available at pharmacies without a prescription – ask at the pharmacy. Ella requires a prescription.
