Imagine this.... You wake up one morning with allergy symptoms. You don't want to miss class/work, but you need care now. What can you do?

How does telehealth work?

You consider urgent care, but you need to social distance & don't want to spend the time/\$

So you **CALL/EMAIL** the FSU Health Center for an appointment

A FSU nurse practitioner calls you back to discuss your symptoms / perform a **TELEHEALTH VISIT** via videoconference

Turns out you **DO** have seasonal allergies

You get the medical advice you need & are on your way to feeling **BETTER**
