

## **Diagnosis and Treatment of Acute Illness and Injuries**

The Health Center can diagnosis and treat viral and bacterial infections, including urinary tract infections, strep throat, influenza, mono, the common cold and sinusitis. We also help manage seasonal allergy symptoms and stomach pain/gastroenteritis. In addition to these services, the Health Center can assess rashes, cuts and abrasions, sprains and remove stitches.

The providers in the Health Center can prescribe medications as needed and order lab work or imaging, such as x-rays, to assist in a diagnosis. Rapid 5 minute strep, mono and influenza tests are also utilized in the Health Center. Providers can refer to specialists as needed.

For information about various illnesses and how to care for them, see the Student Self Care Guide. Campus Police is available 24 hours a day to assist with emergency medical situations – contact them at 508-626-4911.
