

## **Sexually Transmitted Infections (STI) - Screening, Counseling and Treatment for Men and Women**

The Health Center offers STI screening through Quest laboratory. We screen for gonorrhea, chlamydia and trichomoniasis. We also diagnosis herpes and genital warts.

### ***Will I be billed for testing? Will my parents know I got tested?***

When any test is sent to the laboratory from the Health Center, Quest will bill your insurance company for the cost of the test. Please bring your insurance card to every visit – Quest will need this information for billing.

Because every insurance plan is different, we suggest contacting your insurance company for more information regarding costs, as well as whether any kind of statement will be sent to the Insurance Policy Holder regarding testing that was performed. This will be the same laboratory billing policy regardless of whether you use your PCP, an urgent care clinic or FSU Health Center.

For other testing, including HIV and STI tests that do not use your insurance company:
