PRE-ENGINEERING PROGRAM

This program establishes a freshman and sophomore curriculum leading to transfer admission by Articulation Agreement (2+3, 3+3) to a Bachelor of Science degree program in one of the engineering disciplines at the:

University of Massachusetts-Lowell:
Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Plastics Engineering, and Engineering Technology
University of Massachusetts-Dartmouth:
Bio-Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering
Mass Maritime Academy:
Energy Engineering, Facilities Engineering.
Worcester Polytechnic Institute:

Each student who enters the program will be assigned an advisor from the Department of Physics and Earth Sciences. By the end of their freshman year, students should be considering what specific area of engineering they wish to transfer into at the above-mentioned institutions. It may be necessary for transfer students to schedule summer session coursework if they wish to complete all degree requirements over a four-year period.

The program of study during the two years at Framingham State University is shown below. Each incoming student must pass the mathematics placement examination in order to register for a credit- bearing mathematics course. Students must do well on this examination to begin the mathematics sequence with Calculus I. Students who do not place into the Calculus I course are required to take additional mathematics prior to taking Calculus I. Courses to be taken during the sophomore year of the program depend, to some extent, on the choice of engineering concentration.
